**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

Claim 1 - Claim 36: Cancelled

37. (Newly Added) A safety valve assembly for a fluid transmission line for transmitting fluid from a fixed supply to a fixed end user, the safety valve assembly comprising:

a valve, the valve having a region for a pressurised fluid therein, the region having an outlet through which a fluid can pass,

wherein the valve is arranged to be remotely, wirelessly, and electronically operable by a portable device.

38. (Newly Added) A safety valve assembly according to Claim 37, wherein the valve is arranged to be remotely, wirelessly, and electronically operable by a radio control fob.

39. (Newly Added) A safety valve assembly according to Claim 37, wherein the valve is arranged to be remotely, wirelessly, and electronically operable by a telephone.

40. (Newly Added) A safety valve assembly according to Claim 37, in combination with a portable device for controlling the safety valve assembly.

41. (Newly Added) A safety valve assembly according to Claim 40, wherein the portable device comprises a radio control fob for controlling the safety valve assembly.

42. (Newly Added) A safety valve assembly according to Claim 40, wherein the portable device comprises a telephone for controlling the safety valve assembly.

43. (Newly Added) A safety valve assembly according to Claim 37, wherein the valve is a motor driven valve.

44. (Newly Added) A safety valve assembly according to Claim 37, wherein the safety valve assembly comprises a relay unit, the safety valve assembly being arranged to sense a parameter, and react to the sensing of a parameter, by actuating the valve, via the relay, to seal the region.

45. (Newly Added) A safety valve assembly according to Claim 37, wherein the valve is arranged on a fluid transmission line for transmitting a fluid from a fixed supply to a fixed end user.

46. (Newly Added) A method of operating a safety valve assembly for a fluid transmission line for transmitting fluid from a fixed supply to a fixed end user, the method comprising using a portable device to remotely, electronically, and wirelessly, operate the safety valve assembly so as to be able to regulate the flow of fluid through the valve.

47. (Newly Added) A method of operating a safety valve assembly for a fluid transmission line for transmitting fluid from a fixed supply to a fixed end user according to Claim 46, the method further comprising using a portable radio control fob to send a radio signal to the safety valve assembly.

48. (Newly Added) A method of operating a safety valve assembly according to Claim 47, the method further comprising using the portable radio control fob to send a further radio signal to a further safety valve assembly.

49. (Newly Added) A method of operating a safety valve assembly for a fluid transmission line for transmitting fluid from a fixed supply to a fixed end user according to Claim 46, the method further comprising using a telephone to send a signal to the safety valve assembly.

50. (Newly Added) A method of operating a safety valve assembly according to Claim 49, the method further comprising using the telephone to send a further signal to a further safety valve assembly.
